This quick guide is only meant to outline basic functionality. Please visit www.fanatec.com/support in order to learn more about all of the features of this product. This is just a quick guide, features may be missed if manual is not read.

This product is under warranty of Endor AG, Seligenthaler Straße 16a, 84034 Landshut, Germany, Telephone: +49 (871) 9221-122, Fax: +49 (871) 9221-221, Email: info.webshop@fanatec.com. Refer to the chapter ‘warranty’ of the user manual as well as the terms & conditions of Endor AG on https://www.fanatec.com.

**ATTENTION**

When starting up the Podium Wheel Base for the first time please update the firmware, you can obtain it from www.fanatec.com/downloads. Follow the instructions provided by the user manual.

Compatibility with PlayStation ®4 games on a case by case basis. For a full list of compatible games, please visit www.fanatec.com.

Do not cover the air intake on the front side with accessories, and do not place any items in a 10cm range behind the wheel base to allow proper cooling airflow.

---

**ATTACHING THE STEERING WHEEL**

1. Turn the locking ring in a CW direction to the back of the shaft. Make sure the rubber ring is not compressed.
2. Turn the locking ring in a CCW direction for a tight fit.
3a. Proceed in reverse order to remove the wheel from the base.
3b. Rotate the shaft so the groove points to the top.
4. Fanatec ClubSport Quick Release: Pull and hold the Quick Release sleeve and carefully push the steering wheel onto the shaft. Release the sleeve.
5. When using the Fanatec ClubSport Quick Release on a Podium DD Base, no screw is required.
6. For a simplified Quick Release: carefully push the steering wheel onto the shaft. Use the M6x20 screw from the Podium Wheel Base accessories for tightening the clamping ring.

**NOTE:**

When a simplified Quick Release is used, the wheel base automatically limits the torque to prevent damage. ClubSport Quick Releases are required to utilize full torque.

---

**ON AND OFF**

**POWER BUTTON**

To turn on the Podium Wheel Base connect it to power and press the POWER BUTTON for about one second on the back side. Also the (optional) Podium Kill Switch has a power button to turn on the wheel base.

To turn off, press and hold the POWER BUTTON for 5 seconds and then release.

The Torque Key (H) unleashes the full torque of the Podium Wheel Base. You will be prompted by a safety warning before use. Due to safety reasons this Torque Key is not inserted at the factory. Please take care and read all safety warnings before inserting the Torque Key.

To protect unexperienced users and children from injuries we recommend to always remove the torque key when the wheel base is not in use and/or unattended.

Please take care to insert the Torque Key only into the “Torque Key” port and not to other ports of the wheel base, or any other devices besides the Podium Wheel Base.

---

**CONTENTS**

**A**

- • PS4™ Compatible Podium Wheel Base (A)
- • ClubSport Steering Wheel F1® PS4™ with APM (B)
- • Power supply unit (C)
- • Power cord (regional) (D)
- • USB connection cable (E)
- • Cylinder head screw ISO 4762 M6x20 (only for simplified Quick Release) (F)
- • RJ12 connection cable for Pedals (G)
- • Torque Key (H)
- • Racing style button caps (I)

**B**

- • ClubSport Steering Wheel F1® PS4™ with APM (B)

**C**

- • Power supply unit (C)

**D**

- • Power cord (regional) (D)

**E**

- • USB connection cable (E)

**F**

- • Cylinder head screw ISO 4762 M6x20 (only for simplified Quick Release) (F)

**G**

- • RJ12 connection cable for Pedals (G)

**H**

- • Torque Key (H)

**I**

- • Racing style button caps (I)

---

**ATTENTION**

Do not use the M6x16 screw provided with your steering wheel! Replace it for the cylinder head screw (F) from Podium Wheel Base package content!

---

**NOTICE:**

Only use the power supply (C) and power cord (D) included with this product.

---

**IMPORTANT**

If you have an existing Fanatec Pedal set, please replace the old RJ12 cable with the new one included (G). When connecting the power supply (C), please connect it to the DD Wheel Base (A) BEFORE connecting it to the power outlet/socket (D).
**CONNECTIONS**

Please make sure to insert the Torque Key only into the "Torque Key" port and not to other ports of the wheel base.

**ADDITIONAL ACCESSORIES**

- **CONNECTION TO CAN BUS**
- **HANDBRAKE**
- **PEDAL**
- **H-PATTERN SHIFTERS**
- **STATIC SHIFTER**
- **SEQUENTIAL SHIFTER**

**POWER PLUG**

Plug in with the clamping hook pointing upwards
unplug while pressing down the clamping hook.

**PODIUM KILL SWITCH**

**TORQUE KEY**

Enables full torque. Please read all safety precautions before use.

**USB TO PC/CONSOLE**

Important!

In H-pattern mode or SQ mode

To enter shifter calibration mode, simultaneously press the tuning button and the button highlighted below.

A more detailed description you can find in the shifter Quick Guide.

**MODES**

To change modes, simultaneously press the two highlighted buttons below.

**NOTE:** Each steering wheel has a different button press combination in order to change modes. Please see your wheel’s quick guide in order to see which button press combination is required.

**BASE DISPLAY SCREENS**

The OLED display of the Podium Wheel Base by default shows the Fanatec logo, detected peripherals, USB connection and operation mode.

Beyond that the display also can show alternative screens with different data, for example installed firmware versions, torque curves or device temperatures.

To enter tuning menu, press the tuning menu button ONCE.

To navigate inside the menu, use the right FunkySwitch.

Press it up or down to access 5 setups. Press FunkySwitch right or left to go through the options and turn the FunkySwitch to change option values.

To enter tuning menu, press the tuning menu button ONCE.

To navigate inside the menu, use the right FunkySwitch.

Press it up or down to access 5 setups. Press FunkySwitch right or left to go through the options and turn the FunkySwitch to change option values.

**ATTENTION!**

Please make sure to use the straight USB plug packaged with this product to avoid damage to the USB port.

**IMPORTANT!**

If a centre calibration is needed (e.g. after firmware update of the wheel base) while using the tuning menu on your PC (e.g. Fanatec Tuning Menu Software) please access the picture at the bottom of this page to enter tuning menu.

When tuning menu is active the screen will say "calibrating the wheel center".

Please take care to insert the Torque Key only into the "Torque Key" port and not to other ports of the wheel base.

NOTE: Such steering wheel has a different button press combination in order to change modes. Please see your wheel’s quick guide in order to see which button press combination is required.

The current active operation mode is indicated on the upper left corner of the wheel base’s OLED display:
