HARD-MOUNTING

ATTENTION

- IMPORTANT: Use only good quality M6 bolts. Choose the correct bolt length to prevent the thread from reaching more than 16 mm into the wheel base. Example: If your table is 20 mm thick, the bolts must not exceed a total thread length of 36 mm! Always use all three hard-mount points as this allows for a proper and stable installation and avoids damage!
- NOTE: Table clamp (B) has to be below table top.
- NOTE: To update the racing wheel for the first time please update the firmware, you can obtain it from www.fanatec.com/downloads. Follow the instructions provided by user manual.
